Product Design | System Architect | Founder Mindset

Hi, I'm Shi Zheng, 4yr Web3 Product Lead & 3yr SaaS Product Director

Expert at building order in complexity: From SaaS backends to on-chain data trading engines, I specialize in deconstructing business logic in fast-paced environments, building standardized product systems, and closing the value loop from business needs to final delivery.

WEB3 ACHIEVEMENTS

$2.1M+ Raised **$500k+** ARR

SAAS PERFORMANCE

¥10M+ Revenue Delivered 5+ **Million-level KA**

Work Experience

Intelfinity Labs Limited | Web3 Data Analytics & Trading Terminal | $2.1M+ Investment from BoostVC/AllianceDAO/Angels

Product Lead & Co-founder Sep 2021 - Apr 2025 | Recommendation Letter

As a Co-founder, built the product and a 10+ person R&D team from 0 to 1. Led the delivery of two core Candlestick.io products, covering copy-trading algorithms, smart wallets, swap/limit orders, trader performance analytics, and token metrics, achieving $500k+ ARR.

Copy Trading Platform

Case Study →

- Designed a multi-chain copy-trading execution engine to help users duplicate Smart Money profits.
- Integrated token security services and self-developed filtering models to build a risk management engine, ensuring security for high-net-worth traders.

$1.2M+ AUM | **$7M+** Monthly Volume | **$400K+** Peak Profit Sharing

TraderScan

Case Study →

- Developed the TraderScan algorithm to parse 100M+ on-chain addresses, visualizing trader performance.
- Built multi-dimensional Smart Money profiling models (Win Rate/PnL/Style), transforming massive data into actionable trading signals.

$22k+ Monthly SaaS Rev | **31k+** Monthly Uniques | **1k+** DAU

R&D Management & Efficiency

- Established agile processes, promoting modular component libraries and improving code reuse and iteration speed by 50%.
- Managed the full product lifecycle, delivering 20+ major releases and 100+ feature iterations.

Regentsoft | Leading ERP/SaaS Provider for Fashion Industry

Product Director Jul 2017 - Aug 2021

Managed the scm business line with a 50+ person team, leading R&D and KA support. Led a team of 10+ PMs to transform from traditional ERP to "Cloud + Platform" architecture, supporting millions in annual revenue.

eSCM (0-1)

Case Study →

- Led R&D of a large-scale MD–PLM–PMC–MES system for end-to-end supply chain digitalization.
- Designed modular SaaS and business abstraction model to serve diverse client needs.
- Drove pre-sales with whitepapers and SOPs; supported million-dollar deals with top brands (e.g. Eifini, Yalu).
- Served 10+ top brands and ~100 ODM factories; scaled daily MES capacity into the company' s second growth curve.

Platform Construction & Team Mgmt

Components →

- Set company-wide B-side standards and component libraries; unified product design across 4 business lines.
- Led PMs through middle-office refactor and microservices/infrastructure architecture.
- Built training and competency frameworks; developed 10+ core product managers across business lines.

Guangzhou Juwan Internet Tech | Leading Mobile Wholesale Mgmt Tool

Product Manager Nov 2015 - Jul 2017

JuNiu Wholesale

- Led the 0-1 construction and iteration of the mobile management tool for traditional clothing wholesalers.
- Grew the product to a top-3 market share position, facilitating hundreds of millions in monthly orders with over 90% client retention.
